

Permit with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

4Recycling Ltd
The Old Peat Works
Reading Gate
Swinefleet
Goole
East Riding of Yorkshire
DN14 8DT

Permit number

EPR/GB3202XN

The Old Peat Works

Permit number EPR/GB3202XN

Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

4Recycling Ltd (4R) have applied to operate a waste treatment and storage facility at The Old Peat Works, Reading Gate, Swinefleet, Goole, East Riding of Yorkshire, DN14 8DT. This is located approximately 3.8 km north of Crowle and approximately 3.5 km west of Eastoft. The site is centred at approximately National Grid Reference (NGR) SE 76921 16851.

The permit authorises the operator to store and treat hazardous and non-hazardous wastes on site to produce materials suitable for spreading to land as soil improvers and replacements for artificial fertilisers. The annual throughput of the site is limited to 100,000 tonnes per year of which no more than 10,000 tonnes is to be hazardous waste. The maximum quantity of hazardous waste treated on site is not to exceed 10 tonnes a day with no more than 50 tonnes of hazardous waste stored on site pending treatment.

The activities carried out on site include the chemical and physical treatment of sludges and other wastes, the conditioning of cement kiln dusts and by-pass dusts with water only, and the manual sorting, separation, screening, baling, shredding, crushing or compaction of waste into different components for recovery. No composting is permitted under the permit. The permit also allows the storage of wastes prior to land treatment. The permit does not allow any spreading of treated waste to land. All wastes accepted and subsequently treated on the site will require the appropriate assessment and authorisation prior to spreading to land.

All treatment and storage of wastes will be undertaken on impermeable surfacing with all contaminated surface water collected in the onsite 'dirty water lagoon' for offsite disposal. Only clean, uncontaminated surface water will be discharged to the surrounding water courses via the clean water lagoon.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

End of introductory note

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/GB3202XN

The Environment Agency hereby authorises, under regulation 13 of the Environmental Permitting (England and Wales) Regulations 2016

4Recycling Ltd (“the operator”),

whose registered office is

Control House

A1 Business Park

Knottingley Road

Knottingley

West Yorkshire

WF11 0BU

company registration number 05747690

to operate waste operations at

The Old Peat Works

Reading Gate

Swinefleet

Goole

East Riding of Yorkshire

DN14 8DT

to the extent authorised by and subject to the conditions of this permit.

Name	Date
Principal Permitting Team Leader	21/10/2020

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
 - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.
- 1.1.4 The operator shall comply with the requirements of an approved competence scheme.

1.2 Avoidance, recovery and disposal of wastes produced by the activities

- 1.2.1 The operator shall take appropriate measures to ensure that:
- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
 - (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
 - (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.
- 1.2.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the "activities").

2.2 The site

- 2.2.1 The activities shall not extend beyond the site, being the land shown edged in red on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.3, unless otherwise agreed in writing by the Environment Agency.

2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation (“plan”) specified in schedule 1, table S1.3 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.

2.3.3 Waste shall only be accepted if:

- (a) it is of a type and quantity listed in schedule 2 tables S2.1, S2.2, S2.3, and S2.4, and;
- (b) it conforms to the description in the documentation supplied by the producer and holder.

2.4 Pre-operational conditions

2.4.1 The activities shall not be brought into operation until the measures specified in schedule 1 table S1.2A have been completed.

2.4.2 The operations specified in schedule 1 table S1.2B shall not commence until the measures specified in that table have been completed.

2.5 Technical requirements

Hazardous waste storage and treatment

2.5.1 Hazardous waste shall not be mixed, either with a different category of hazardous waste or with other waste, substances or materials, unless it is authorised by schedule 1 table S1.1 and appropriate measures are taken.

3 Emissions and monitoring

3.1 Emissions to water, air or land

3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 table S3.1 and S3.2.

3.1.2 The limits given in schedule 3 shall not be exceeded.

3.2 Emissions of substances not controlled by emission limits

3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.

3.2.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
- (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.4 Noise and vibration

3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.4.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to noise and vibration, submit to the Environment Agency for approval within the period specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;
- (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.5 Pests

3.5.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

3.5.2 The operator shall:

- (a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests;
- (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.6 Fire prevention

3.6.1 The operator shall take all appropriate measures to prevent fires on site and minimise the risk of pollution from them including, but not limited to, those specified in any approved fire prevention plan.

4 Information

4.1 Records

4.1.1 All records required to be made by this permit shall:

- (a) be legible;
- (b) be made as soon as reasonably practicable;
- (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and

(d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:

- (i) off-site environmental effects; and
- (ii) matters which affect the condition of the land and groundwater.

4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.

4.2.2 Within one month of the end of each quarter, the operator shall submit to the Environment Agency using the form made available for the purpose, the information specified on the form relating to the site and the waste accepted and removed from it during the previous quarter.

4.3 Notifications

4.3.1 The Environment Agency shall be notified without delay following the detection of:

- (a) any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution;
- (b) the breach of a limit specified in the permit; or
- (c) any significant adverse environmental effects.

4.3.2 Any information provided under condition 4.3.1 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.

4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (a) any change in the operator's name or address; and
- (b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual);
- (b) any change in the operator's name(s) or address(es); and

- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (a) the Environment Agency shall be notified at least 14 days before making the change; and
- (b) the notification shall contain a description of the proposed change in operation.

4.4 Interpretation

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made “without delay”, in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1 activities		
Activity Ref	Description of activities for waste operations	Limits of activities
A1	<p>Chemical and physical treatment of sludges and other wastes</p> <p>R3: Recycling/reclamation of organic substances which are not used as solvents.</p> <p>R13: Storage of waste pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where the waste is produced)</p>	<p>Treatment consisting only of blending, mixing, separation, and thickening of waste for recovery.</p> <p>Only product lime is to be used to treat sludges.</p> <p>Waste shall not be stored on site for longer than 3 years.</p> <p>Waste types as specified in Table S2.1.</p> <p>[Note 1], [Note 2]</p>
A2	<p>Conditioning of cement kiln dusts and by-pass dusts</p> <p>R5: Recycling/reclamation of other inorganic materials</p> <p>R13: Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)</p>	<p>Treatment consisting only of conditioning with water.</p> <p>Waste shall not be stored on site for longer than 3 years.</p> <p>Waste types as specified in Table S2.2.</p> <p>[Note 1], [Note 2]</p>
A3	<p>Household, commercial, and industrial waste transfer with treatment</p> <p>R3: Recycling/reclamation of organic substances which are not used as solvents</p> <p>R5: Recycling/reclamation of other inorganic materials</p> <p>R13: Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)</p>	<p>Treatment consisting only of manual sorting, separation, screening, baling, shredding, crushing or compaction of waste into different components for recovery.</p> <p>No more than 500 tonnes a week of imported waste coded as 17 08 02 will be processed in to 19 12 12.</p> <p>Waste shall not be stored on site for longer than 3 years.</p> <p>Waste types as specified in Table S2.3.</p> <p>[Note 1], [Note 2]</p>
A4	<p>Transfer of waste with no treatment</p> <p>R13: Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)</p>	<p>Secure storage of wastes listed in table S2.4.</p> <p>Waste shall not be stored on site for longer than 3 years.</p> <p>Individual wastes listed in table S2.4 must be stored separately.</p> <p>Waste types as specified in Table S2.4.</p>
<p>[Note 1] – For activities A1, A2 and A3, a combined total of no more than 10 tonnes per day of hazardous waste to be treated at the site.</p> <p>[Note 2] - For activities A1, A2 and A3, a combined total of no more than 50 tonnes of hazardous waste pending treatment will be stored at any one time.</p>		

Table S1.2A Pre-operational measures	
Reference	Pre-operational measures
PO1	Before the commencement of operations, the Operator shall ensure that the borehole (SE7 1NE3) on site is appropriately protected to ensure there can be no contamination of the groundwater from onsite activities. Evidence shall be provided to the Environment Agency for agreement in writing prior to waste acceptance on site.
PO2	Before the commencement of operations, the Operator shall provide a revised site plan showing the location of the mobile generator.

Table S1.2B Pre-operational measures for future development		
Reference	Operation	Pre-operational measures
POFD1	The acceptance of liquid waste on site.	<p>No liquid waste shall be accepted on site for storage or treatment until:</p> <ul style="list-style-type: none"> • The site surface, including the surface within the process building has been repaired and confirmed to be impermeable; • The operator has provided evidence to demonstrate the integrity of the proposed containment for contaminated water; • The operator provides a report for the construction of the silos on site. The report requires evidence that the silos for storing liquid wastes and granular wastes are banded correctly in order to contain 110% of the largest tank; and • The Environment Agency has agreed in writing that the storage and treatment of liquid waste can commence on site. • The operator has confirmed if there are any changes to the drainage of the site, and if so, a revised drainage plan(s) has been submitted and approved by the Environment Agency.
POFD2	The acceptance of solid waste on site.	<p>No solid waste shall be accepted on site for storage or treatment until:</p> <ul style="list-style-type: none"> • The site surface, including the surface within the process building has been repaired and confirmed to be impermeable; • The operator has provided evidence to demonstrate the integrity of the proposed containment for contaminated water; • The process building is in a fit state of repair and suitable for the treatment of wastes; • The Environment Agency has agreed in writing that the storage and treatment of solid waste can commence on site. • The operator has confirmed if there are any changes to the drainage of the site and if so a revised drainage plan(s) has been submitted and approved by the Environment Agency.
POFD3	The acceptance of combustible waste on site.	<p>Prior to the acceptance of combustible waste on site the Operator shall submit to the Environment Agency:</p> <ul style="list-style-type: none"> • The design, installation and maintenance of the in building detection and suppression system which will be covered by an appropriate UKAS accredited third party certification scheme or a demonstrable alternative third party accreditation or standard; • The automatic fire detection system for the outside storage areas has been installed and is operational; • A commissioning plan has been submitted to the Environment Agency that includes, but not limited to, confirmation that the above measures have been completed; • A revised Fire Prevention Plan incorporating the above points; and

Table S1.2B Pre-operational measures for future development		
Reference	Operation	Pre-operational measures
		<ul style="list-style-type: none"> The Environment Agency has agreed in writing that combustible waste storage and treatment can commence on site.
POFD4	The acceptance of waste code (as listed in Table S2.4).	The waste code 19 13 06 as listed in Table S2.4 shall not be accepted on site for storage until an appropriate outlet has been identified by the Operator. Evidence shall be provided to the Environment Agency for agreement in writing prior to the waste being accepted on site.

Schedule 2 – Waste types

Table S2.1 Permitted waste types and quantities for physical or chemical treatment	
Maximum quantity	The total quantity of waste accepted at the site for the above activity A1 shall be less than 75,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
06	Wastes from inorganic chemical processes
06 02	wastes from the MFSU of bases
06 02 01*	calcium hydroxide as a by-product from gas production only
17	Construction and demolition wastes (including excavated soil from contaminated sites)
17 05	soil (including excavated soil from contaminated sites), stones and dredging spoil
17 05 06	dredging spoil other than those mentioned in 17 05 05
19	Wastes from waste management facilities, off-site waste water treatment plants and the preparation of water intended for human consumption and water for industrial use
19 02	wastes from physico/chemical treatments of waste (including dechromatation, decyanidation, neutralisation)
19 02 06	sludges from physico-chemical treatment other than those mentioned in 19 02 05 (sewage sludge only).
19 05	wastes from aerobic treatment of solid wastes
19 05 03	off-specification compost (sewage sludge only).
19 06	wastes from anaerobic treatment of waste
19 06 06	digestate from anaerobic treatment of animal and vegetable waste (sewage sludge only).
19 08	wastes from waste water treatment plants not otherwise specified
19 08 01	screenings
19 08 02	waste from desanding
19 08 05	sludges from treatment of urban waste water
19 09	wastes from the preparation of water intended for human consumption or water for industrial use
19 09 02	sludges from water clarification
19 13	wastes from soil and groundwater remediation
19 13 04	sludges from soil remediation other than those mentioned in 19 13 03
19 13 06	sludges from groundwater remediation other than those mentioned in 19 13 05
20	Municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions
20 03	other municipal wastes
20 03 04	septic tank sludge

Table S2.2 Permitted waste types and quantities for the treatment of wastes by the conditioning with water only.	
Maximum quantity	The total quantity of waste accepted at the site for the above activity A2 shall be less than 25,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
10	Wastes from thermal processes
10 01	wastes from power stations and other combustion plants (except 19)
10 01 01	bottom ash, slag and boiler dust (excluding boiler dust mentioned in 10 01 04) Limited to poultry litter ash, paper sludge ash and ash from wood chip boilers only
10 13	wastes from manufacture of cement, lime and plaster and articles and products made from them
10 13 12*	solid wastes from gas treatment containing hazardous substances. Limited to cement kiln dusts and by-pass dust only
10 13 13	solid wastes from gas treatment other than those mentioned in 10 13 12. Limited to cement kiln dusts and by-pass dust

Table S2.3 Permitted waste types and quantities for the Household, commercial, and industrial waste transfer station with treatment	
Maximum quantity	The total quantity of waste accepted at the site for the above activity A3 shall be less than 30,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
01	Wastes resulting from exploration, mining, quarrying, and physical and chemical treatment of minerals
01 01	wastes from mineral excavation
01 01 02	chalk only
01 04	wastes from physical and chemical processing of non-metalliferous minerals
01 04 08	chalk only
02	Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing, food preparation and processing
02 01	wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing
02 01 03	plant-tissue waste
02 01 07	wastes from forestry
02 03	wastes from fruit, vegetables, cereals, edible oils, cocoa, coffee, tea and tobacco preparation and processing; conserve production; yeast and yeast extract production, molasses preparation and fermentation
02 03 04	biodegradable materials unsuitable for consumption or processing only
02 04	wastes from sugar processing
02 04 01	soil from cleaning and washing beet
02 04 02	off-specification calcium carbonate
02 05	wastes from the dairy products industry
02 05 01	biodegradable materials unsuitable for consumption or processing
02 06	wastes from the baking and confectionery industry

Table S2.3 Permitted waste types and quantities for the Household, commercial, and industrial waste transfer station with treatment

Maximum quantity	The total quantity of waste accepted at the site for the above activity A3 shall be less than 30,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
02 06 01	biodegradable materials unsuitable for consumption or processing
02 06 02	wastes from preserving agents
02 07	wastes from the production of alcoholic and non-alcoholic beverages (except coffee, tea and cocoa)
02 07 01	wastes from washing, cleaning and mechanical reduction of raw materials
02 07 02	wastes from spirits distillation
02 07 04	materials unsuitable for consumption or processing
03	Wastes from wood processing and the production of panels and furniture, pulp, paper and cardboard
03 01	wastes from wood processing and the production of panels and furniture
03 01 01	waste bark and cork
03 01 05	untreated sawdust and wood shavings other than those mentioned in 03 01 04 only
03 03	wastes from pulp, paper and cardboard production and processing
03 03 01	waste bark and wood, pulp from virgin timber
03 03 10	fibre rejects and sludges including mineral based fillers and coatings only
04	Wastes from the leather, fur and textile industries
04 02	wastes from the textile industry
04 02 21	wastes from unprocessed biodegradable textile fibres only
04 02 22	wastes from processed biodegradable textile fibres only
06	Wastes from inorganic chemical processes
06 02	wastes from the MFSU of bases
06 02 01*	calcium hydroxide as a by-product from gas production only
10	Wastes from thermal processes
10 01	wastes from power stations and other combustion plants (except 19)
10 01 01	poultry litter ash, paper sludge ash and ash from wood chip boilers only
10 01 05	Flue gas gypsum (solid) only
10 01 07	Flue gas gypsum (sludge) only
10 13	wastes from manufacture of cement, lime and plaster and articles and products made from them
10 13 04	wastes from calcination and hydration of lime
10 13 12*	cement kiln dusts and by-pass dust only
10 13 13	cement kiln dusts and by-pass dust other than those mentioned in 10 13 12 only
16	Wastes not otherwise specified in the list
16 03	off-specification batches and unused products
16 03 06	out of date and out of specification beverages only
17	Construction and demolition wastes (including excavated soil from contaminated sites)

Table S2.3 Permitted waste types and quantities for the Household, commercial, and industrial waste transfer station with treatment

Maximum quantity	The total quantity of waste accepted at the site for the above activity A3 shall be less than 30,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
17 05	soil (including excavated soil from contaminated sites), stones and dredging spoil
17 05 04	topsoil, peat, subsoil and stones only other than those mentioned in 170503
17 05 06	dredging spoil other than those mentioned in 17 05 05
17 08	gypsum-based construction material
17 08 02	gypsum-based construction materials other than those mentioned in 17 08 01
19	Wastes from waste management facilities, off-site waste water treatment plants and the preparation of water intended for human consumption and water for industrial use
19 01	wastes from incineration or pyrolysis of waste
19 01 12	ash from the incineration of pig and poultry carcasses at premises used for agriculture only
19 01 18	biochar manufactured from untreated wood, bark, and cork from the furniture manufacturing and wood processing industries (including untreated sawdust, wood shavings, and wood cuttings, except from particle board).
19 01 18	biochar manufactured from untreated wood and plant matter from agriculture, horticulture and forestry, or from vegetable waste from food preparation and processing.
19 02	wastes from physico/chemical treatments of waste (including dechromatation, decyanidation, neutralisation)
19 02 03	cement kiln dust and by-pass dust from cement kilns conditioned with water only
19 02 04*	cement kiln dust and by-pass dust from cement kilns conditioned with water only
19 05	wastes from aerobic treatment of solid wastes
19 05 03	compost from source segregated biodegradable waste only
19 05 03	compost from source segregated biodegradable waste and sludges from treatment of urban waste water only
19 05 03	compost derived from one or more non-source segregated biodegradable wastes
19 06	wastes from anaerobic treatment of waste
19 06 04	whole digestate and fibre digestate from anaerobic treatment of non-source segregated biodegradable waste only
19 06 06	whole digestate from anaerobic treatment of source segregated biodegradable waste and sludges from treatment of urban waste water only
19 06 06	whole digestate and fibre digestate from anaerobic treatment of source segregated biodegradable waste and sludges from treatment of urban waste water only
19 06 06	digestate from anaerobic treatment of animal and vegetable waste (sewage sludge only)
19 06 06	digestate from the aerobic treatment of source segregated biodegradable waste
19 08	wastes from waste water treatment plants not otherwise specified
19 08 01	screenings
19 12	wastes from the mechanical treatment of waste (for example sorting, crushing, compacting, pelletising) not otherwise specified
19 12 12	soil substitutes (other than those containing dangerous substances) only
19 13	wastes from soil and groundwater remediation

Table S2.3 Permitted waste types and quantities for the Household, commercial, and industrial waste transfer station with treatment	
Maximum quantity	The total quantity of waste accepted at the site for the above activity A3 shall be less than 30,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
19 13 06	sludges from groundwater remediation other than those mentioned in 19 13 05
20	Municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions
20 02	garden and park wastes (including cemetery waste)
20 02 01	seaweed only
20 02 01	plant tissue waste from parks only
20 02 02	soil and stones

Table S2.4 Permitted waste types and quantities for the storage of wastes only pending recovery to land	
Maximum quantity	The total quantity of waste accepted at the site for the above Activity A4 shall be less than 75,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
01	Wastes resulting from exploration, mining, quarrying, and physical and chemical treatment of minerals
01 01	wastes from mineral excavation
01 01 02	chalk only
01 04	wastes from physical and chemical processing of non-metalliferous minerals
01 04 08	chalk only
02	Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing, food preparation and processing
02 01	wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing
02 01 01	soils and sludges from the washing and cleaning fruit and vegetables only.
02 01 03	plant-tissue waste
02 01 06	farmyard manure and slurry, horse manure and soiled bedding made from plant tissue only
02 01 06	slurry, manure and soiled bedding from any premises (except abattoirs), soiled biodegradable bedding and soiled bedding desiccants only
02 01 06	slurry, manure and soiled bedding from abattoirs including soiled biodegradable bedding and soiled bedding desiccants only
02 01 07	wastes from forestry
02 02	wastes from the preparation and processing of meat, fish and other foods of animal origin
02 02 01	sludges from washing and cleaning from abattoirs, poultry preparation plants, rendering plants or fish preparation plants only
02 02 01	sludges from secondary food processing or the cook chill sector only
02 02 02	egg shells from hatcheries, processing plants and similar premises only
02 02 02	shellfish shells from which the soft tissue or flesh has been removed only
02 02 02	cooked shellfish shell which is not completely free of flesh

Table S2.4 Permitted waste types and quantities for the storage of wastes only pending recovery to land	
Maximum quantity	The total quantity of waste accepted at the site for the above Activity A4 shall be less than 75,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
02 02 02	blood and gut contents from abattoirs, poultry preparation plants, rendering plants or fish preparation plants only
02 02 04	sludges from on-site effluent treatment from abattoirs, poultry preparation plants, rendering plants or fish preparation plants only
02 03	wastes from fruit, vegetables, cereals, edible oils, cocoa, coffee, tea and tobacco preparation and processing; conserve production; yeast and yeast extract production, molasses preparation and fermentation
02 03 01	sludges from secondary food processing or the cook chill sector
02 03 01	sludges from washing, cleaning, peeling, centrifuging and separation.
02 03 02	wastes from preserving agents
02 03 03	wastes from solvent extraction
02 03 04	materials unsuitable for consumption or processing
02 03 05	sludges from on-site effluent treatment
02 04	wastes from sugar processing
02 04 01	soil from cleaning and washing beet
02 04 02	off-specification calcium carbonate
02 04 03	sludges from on-site effluent treatment
02 05	wastes from the dairy products industry
02 05 01	materials unsuitable for consumption or processing
02 05 02	sludges from on-site effluent treatment
02 06	wastes from the baking and confectionery industry
02 06 01	biodegradable materials unsuitable for consumption or processing
02 06 02	wastes from preserving agents
02 06 03	sludges from on-site effluent treatment
02 07	wastes from the production of alcoholic and non-alcoholic beverages (except coffee, tea and cocoa)
02 07 01	wastes from washing, cleaning and mechanical reduction of raw materials
02 07 02	wastes from spirits distillation
02 07 03	wastes from chemical treatment
02 07 04	materials unsuitable for consumption or processing
02 07 05	sludges from on-site effluent treatment
03	Wastes from wood processing and the production of panels and furniture, pulp, paper and cardboard
03 01	wastes from wood processing and the production of panels and furniture
03 01 01	waste bark and cork
03 01 05	untreated sawdust and wood shavings other than those mentioned in 03 01 04 only
03 03	wastes from pulp, paper and cardboard production and processing

Table S2.4 Permitted waste types and quantities for the storage of wastes only pending recovery to land	
Maximum quantity	The total quantity of waste accepted at the site for the above Activity A4 shall be less than 75,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
03 03 01	waste bark and wood, pulp from virgin timber
03 03 05	de-inking sludges from paper recycling. Limited to de-inked paper sludge and de-inked paper pulp from paper recycling only
03 03 09	lime mud waste
03 03 10	fibre rejects and sludges including mineral based fillers and coatings only
03 03 11	sludges from on-site effluent treatment other than those mentioned in 03 03 10
04	Wastes from the leather, fur and textile industries
04 01	wastes from the leather and fur industry
04 01 07	sludges, in particular from on-site effluent treatment free of chromium
04 02	wastes from the textile industry
04 02 10	organic matter from natural products only
04 02 15	biodegradable wastes from finishing other than those containing organic solvents only
04 02 20	sludges from on-site effluent treatment other than those mentioned in 04 02 19
04 02 21	wastes from unprocessed biodegradable textile fibres only
04 02 22	wastes from processed biodegradable textile fibres only
05	Wastes from petroleum refining, natural gas purification and pyrolytic treatment of coal
05 01	wastes from petroleum refining
05 01 10	activated sludges from on-site oil refinery biological effluent treatment plants other than those mentioned in 05 01 09.
06	Wastes from inorganic chemical processes
06 02	wastes from the MFSU of bases
06 02 01*	calcium hydroxide as a by-product from gas production only
07	Wastes from organic chemical processes
07 07	wastes from the MFSU of fine chemicals and chemical products not otherwise specified
07 07 12	sludges from on-site biological effluent treatment plant at chemical manufacturing sites other than those mentioned in 07 07 11 only
10	Wastes from thermal processes
10 01	wastes from power stations and other combustion plants (except 19)
10 01 01	poultry litter ash, paper sludge ash and ash from wood chip boilers only
10 01 01	meat and bone meal ash
10 01 05	flue gas gypsum (solid) only
10 01 07	flue gas gypsum (sludge) only
10 13	wastes from manufacture of cement, lime and plaster and articles and products made from them
10 13 04	wastes from calcination and hydration of lime
10 13 12*	cement kiln dusts and by-pass dust only
10 13 13	cement kiln dusts and by-pass dust other than those mentioned in 10 13 12 only

Table S2.4 Permitted waste types and quantities for the storage of wastes only pending recovery to land	
Maximum quantity	The total quantity of waste accepted at the site for the above Activity A4 shall be less than 75,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
16	Wastes not otherwise specified in the list
16 03	off-specification batches and unused products
16 03 03*	gypsum only
16 03 04	gypsum only
16 03 06	out of date and out of specification beverages only
16 10	aqueous liquid wastes destined for off-site treatment
16 10 02	milk from agricultural premises
16 10 02	untreated wash waters from cleaning fruit and vegetables on farm
16 10 02	untreated wash waters from washing and cleaning from abattoirs, poultry preparation plants, rendering plants or fish preparation plants only.
16 10 02	wash waters from secondary food processing or the cook chill sector only
16 10 02	liquor from aerobic treatment of source segregated biodegradable waste only
16 10 02	washwaters from animal by-product handling and processing plants that meet the waste water treatment requirements in the ABPR (Animal By-Product Regulations)
16 10 02	washwaters from animal by product intermediate plants that meet the waste water treatment requirements in the ABPR
17	Construction and demolition wastes (including excavated soil from contaminated sites)
17 05	soil (including excavated soil from contaminated sites), stones and dredging spoil
17 05 04	topsoil, peat, subsoil and stones only other than those mentioned in 17 05 03.
17 05 06	dredging spoil other than those mentioned in 17 05 05
17 08	gypsum-based construction material
17 08 02	gypsum-based construction materials other than those mentioned in 17 08 01
19	Wastes from waste management facilities, off-site waste water treatment plants and the preparation of water intended for human consumption and water for industrial use
19 01	wastes from incineration or pyrolysis of waste
19 01 12	ash from the incineration of pig and poultry carcasses at premises used for agriculture only
19 01 18	biochar manufactured from untreated wood, bark and cork from the furniture manufacturing and wood processing industries (including untreated sawdust, wood shavings and wood cuttings, except from particle board), only
19 01 18	biochar manufactured from untreated wood and plant matter from agriculture, horticulture and forestry, or from vegetable waste from food preparation and processing
19 02	wastes from physico/chemical treatments of waste (including dechromatation, decyanidation, neutralisation)
19 02 03	cement kiln dust and by-pass dust from cement kilns conditioned with water only
19 02 04*	cement kiln dust and by-pass dust from cement kilns conditioned with water only
19 02 06	sludges from physico-chemical treatment other than those mentioned in 19 02 05 (sewage sludge only).
19 05	wastes from aerobic treatment of solid wastes
19 05 03	compost derived from source segregated biodegradable waste only

Table S2.4 Permitted waste types and quantities for the storage of wastes only pending recovery to land	
Maximum quantity	The total quantity of waste accepted at the site for the above Activity A4 shall be less than 75,000 tonnes a year. The total aggregated throughput of the site shall not exceed 100,000 tonnes per year.
Waste code	Description
19 05 03	sewage sludge composted with biodegradable non-wastes only
19 05 03	compost from source segregated biodegradable waste and sludges from treatment of urban waste water only
19 05 03	compost derived from one or more non-source segregated biodegradable wastes
19 05 03	off-specification compost (sewage sludge only).
19 06	wastes from anaerobic treatment of waste
19 06 03	liquor from anaerobic treatment of non-source segregated biodegradable waste only
19 06 04	whole digestate and fibre digestate from anaerobic treatment of non-source segregated biodegradable waste only
19 06 05	liquor from anaerobic treatment of source segregated biodegradable waste only
19 06 06	whole digestate and fibre digestate from anaerobic treatment of source segregated biodegradable waste only
19 06 06	whole digestate and fibre digestate from anaerobic treatment of source segregated biodegradable waste and sludges from treatment of urban waste water only
19 06 06	digestate from anaerobic treatment of animal and vegetable waste (sewage sludge only).
19 06 06	digestate from the aerobic treatment of source segregated biodegradable waste
19 08	wastes from waste water treatment plants not otherwise specified
19 08 02	washed sewage grit only
19 09	wastes from the preparation of water intended for human consumption or water for industrial use
19 09 02	sludges from water clarification
19 12	wastes from the mechanical treatment of waste (for example sorting, crushing, compacting, pelletising) not otherwise specified
19 12 12	soil substitutes other than those containing dangerous substances only
19 12 12	recycled gypsum from plasterboard only
19 13	wastes from soil and groundwater remediation
19 13 04	sludges from soil remediation other than those mentioned in 19 13 03
19 13 06	sludges from groundwater remediation other than those mentioned in 19 13 05
20	Municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions
20 02	garden and park wastes (including cemetery waste)
20 02 01	seaweed only
20 02 02	soil and stones

Schedule 3 – Emissions and monitoring

Table S3.1 Point source emissions to air – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference period	Monitoring frequency	Monitoring standard or method
A1 [Note 1]	Mobile generator	None	None	None	None	None
[Note 1] - Location of emission point to provided prior to operations commencing as per Pre-operational measure 2 (PO2)						

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
W1 on site plan in schedule 7 emission to IBD Drain via on site pond	Clean surface rain water captured by site drainage system	Visible oil or grease	No visible oil or grease	N/A	None	Visual assessment

Schedule 4 – Reporting

There is no reporting under this schedule.

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution	
To be notified within 24 hours of detection	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) Notification requirements for the detection of any significant adverse environmental effect	
To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B – to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	

Name*	
Post	
Signature	
Date	

* authorised to sign on behalf of the operator

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“Annex I” means Annex I to Directive 2008/98/EC of the European Parliament and of the Council on waste.

“Annex II” means Annex II to Directive 2008/98/EC of the European Parliament and of the Council on waste.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“building” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“D” means a disposal operation provided for in Annex I to Directive 2008/98/EC of the European Parliament and of the Council on waste.

“emissions to land” includes emissions to groundwater.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission or background concentration limit.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“groundwater protection zones 1 and 2” have the meaning given in the document titled "Groundwater Protection: Policy and Practice" published by the Environment Agency in 2006.

“Hazardous property” has the meaning in Annex III of the Waste Framework Directive.

“Hazardous waste” has the meaning given in the Hazardous Waste (England and Wales) Regulations 2005 (as amended).

“Industry Standard Protocol” means “A standardised protocol for the monitoring of bioaerosols at open composting facilities” published by the Association for Organics Recycling and developed in conjunction with the Environment Agency.

“List of Wastes” means the list of wastes established by Commission Decision 2000/532/EC replacing Decision 94/3/EC establishing a list of wastes pursuant to Article 1(a) of Council Directive 75/442/EEC on waste and Council Decision 94/904/EC establishing a list of hazardous waste pursuant to Article 1(4) of Council Directive 91/689/EEC on hazardous waste, as amended from time to time.

“pests” means birds, vermin and insects.

“quarter” means a calendar year quarter commencing on 1 January, 1 April, 1 July or 1 October.

“R” means a recovery operation provided for in Annex II to Directive 2008/98/EC of the European Parliament and of the Council on waste.

“Waste code” means the six digit code referable to a type of waste in accordance with the List of Wastes and in relation to hazardous waste, includes the asterisk.

“Waste Framework Directive” or “WFD” means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste.

“year” means calendar year ending 31 December.

When the following terms appear in the waste code list in Schedule 2, tables S2.1, S2.2, S2.3, & S2.4, those tables, they have the meaning given below:

“hazardous substance” means a substance classified as hazardous as a consequence of fulfilling the criteria laid down in parts 2 to 5 of Annex I to Regulation (EC) No 1272/2008.

“stabilisation” means processes which change the hazardousness of the constituents in the waste and transform hazardous waste into non-hazardous waste.

“solidification” means processes which only change the physical state of the waste by using additives without changing the chemical properties of the waste.

“partly stabilised wastes” means wastes containing, after the stabilisation process, hazardous constituents which have not been changed completely into non-hazardous constituents and could be released into the environment in the short, middle or long term.
